

# RISK CHART

\*Approximate allocation targets for each fund as of September 2017. Allocations for the date-specific funds will shift their emphasis (from stocks to bonds) over time based on an assumed retirement age of 65.

As time passes, each fund will gradually shift its emphasis toward a more conservative allocation depending on the maturity date of the fund.

Risk level takes into account the different types of risk applicable to each fund's asset class and investment style.

If you think you'll retire significantly earlier or later, you may want to consider a fund with an asset allocation more appropriate to your situation.

†The Income Fund is designed for retirees who will be making withdrawals.
