

Youth Early Learning

Winter term is full for these programs. Registration for Spring term takes place in March. For more information call the numbers listed.

Amazon Preschool Ages 3-5

Amazon Preschool aims to spark a lifelong love of learning through nature and art while providing developmentally appropriate practices that support the whole child. The goal is to create an engaging and fun educational environment through child-led play and teacher-led group projects that promote independence while also nurturing the social and emotional intelligence and creativity in preschool children.

The focus is on individual early academic development through experiential learning with an emphasis on building social skills. Children engage in arts and science activities that build upon skills to increase dexterity and coordination while having fun. Through self-directed learning children explore, play and become independent learners.

Petersen Barn Preschool Ages 3-5

Through play children experience cooperation, risk and creativity, and engage with and observe the laws and structures of their world. In our small preschool, we practice an exploration and play-based learning approach using weekly themes to structure curriculum and interact with our environments.

Petersen Barn Community Center
9a-12p, MWF or TuTh

Sheldon Early Learning Ages 3-5

Developmentally appropriate curriculum is built around the emerging interests of the children. Language, literacy and mathematics are integrated into all of the children's work throughout the day. All classrooms include hands on exploration with art, science, sensory, music and movement.
