

Lily's Pad

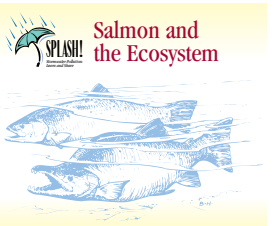

an educational page for kids of all ages!

Hi folks! I'm Lily, the Pacific chorus frog, and I help the City of Eugene teach people about stormwater in our community. You may only think of stormwater when it is raining, but my wildlife friends in the streams and wetlands live in stormwater from your neighborhoods all the time.

When it rains, water from our downspouts and run off from hard surfaces like streets and sidewalks goes into the storm drain. Follow this maze to discover where the water ends up, and then color in this wetland scene.

Teachers: For more information about SPLASH! Stormwater Learn and Share, and Salmon and the Ecosystem, call 682-8482.

Word Scramble *unscramble the letters to find words related to water and the environment*
