

SANTA CLARA-RIVER ROAD IMPLEMENTATION PLANNING TEAM (SCRRIPT)

NOTE: Vision statements were crafted from 'Best outcomes' shared during the 2014-15 Listening Sessions. The topic areas used by SCRRIPT are slightly different from those being used in the River Road-Santa Clara Neighborhood Plan process.

Vision Statement: Transportation

River Road is a safer road for all users, including those driving cars, people walking or cycling, and people using transit. The River Road is more than the asphalt between curbs; it is reinvented as an urban street that is comfortable for walking conveniently to the places residents need and want to go. A safer, slower, and more comfortable River Road establishes a foundation for a vibrant, community-oriented street that hums with local business activity. Neighborhood streets are improved with context sensitive solutions that address safety concerns while retaining the rural character.
