

May 18, 2018

The Airport is currently processing an amendment to the existing 11-11-C-01-EUG and 15-12-C-00-EUG PFC applications. The FAA process requires public notice on the matter.

The amendment represents the following revisions:

Num.	Project Title	Status	Previous Approved Amount	Amended Amount
001	Terminal Checkpoint Reconfiguration – aka Terminal Expansion – Phase 1	Completed	4,304,968	4,716,644
002	Baggage Claim Expansion	Completed	2,528,314	2,770,092
003	North Terminal Stairway Enclosure	Completed	180,000	392,045
		Totals	7,013,282	7,878,781
12-001	Access Control Upgrade	Completed	2,000,000	3,297,264

There is no change to the financing or PFC level. The net change in this amendment is an increase of \$2,162,763.

The amendment increases PFC funding for all projects based on the final PFC eligible costs realized for each project. Final project expenses were reviewed by the Airport and the FAA for eligibility.

Terminal Checkpoint, Baggage Claim and North Terminal Stairway projects represented a change in costs resulting from unknown conditions prior to construction.

Access Control Upgrade represents a change in project scope. Additional work on gate infrastructure was necessary to complete the project. Additional components were added to the project scope based on engineering recommendations. Only costs relating directly to original project scope are added to the PFC application.

If you have any questions, please call either Tim Doll or myself at 541-682-5430.
