

Bringing Your Vision to Life

We received more than 1,500 responses from the community about how they envision the Downtown Riverfront Park. It's clear from the survey that the community wants a safe, accessible and inclusive experience, and, ideally, they want a way to get down to the water.

The Willamette River is an incredibly important natural resource, and provides incredibly important wildlife/habitat/natural services. Our lack of connectivity and connection to our river is surprising and I am so thankful you are taking a thoughtful and collaborative approach to developing this project.

– Survey Response

I just want to emphasize how excited I am about this project. This is such an opportunity for the community to redefine itself and strengthen its identity.

– Survey Response

Survey Says

76% want the feel to be a **mix of urban and natural**

Top two choices for permanent art: **integrated** and **functional**.

Top two natural park features: **river overlooks** and **habitat restoration**.

Nearly all respondents requested some kind of **bike and pedestrian path separation** through the park

The most popular choices for recreational amenities are **nature play** and **open lawn**
