

Human Rights Commission

Sustainability Commission

Esteemed Councilors,

The Human Rights Commission in partnership with the Sustainability Commission urge you as the City Council to endorse the Declaration for Human Rights and Climate Change. As a Council, you have made numerous strides to support both human rights as well as promoting climate recovery within our community.

As the City of Eugene strives to be a leader in both social and environmental justice, we have the opportunity to be the first city of our size, and the second in the United States, to endorse the Declaration for Human Rights and Climate Change.

Both the Human Rights Commission and the Sustainability Commission support this Declaration with a unanimous vote. Please help us represent our constituents as we join numerous entities throughout the world in endorsing this Declaration.

Thank you,

City of Eugene Human Rights Commission

City of Eugene Sustainability Commission
