

Parks & Natural Resources

VISION: River Road and Santa Clara celebrate a rich diversity of private and shared green spaces, including parks for recreation, natural areas that support native plants and wildlife, and farmland for food production. All residents have a clean, safe, accessible and well maintained park or recreation facility close to their home. Residents have access to the Willamette River, which is celebrated as a natural asset, a defining characteristic of both neighborhoods, and a statewide resource to be protected for future generations. Natural assets, such as the tree canopy, soils and the watershed, are highly valued and cared for as natural infrastructure that enhances ecosystem health, provides opportunities for recreation, and supports the working landscape.

Draft GOAL 7: Ensure that that natural areas are healthy, thriving spaces with habitat for native species and provide natural infrastructure.

IDEAS & VALUES (FALL 2017)

- Leave parks wild but monitor for illegal activity
- Keep Willamette River natural
- Preserve riparian vegetation
- Keep all natural areas and maintain their quality, plant more trees
- Wildlife corridor, open space
- Natural spaces not treated with pesticides
- Protect old trees that are being cut down
