Transportation

VISION: The integrated transportation system in River Road and Santa Clara is safe, efficient, and accessible for people of all ages, abilities, and socio-economic levels who choose to bike, walk, drive, or use public transit. This system supports redevelopment, economic opportunity and affordable, convenient access to daily needs. The design of the transportation system enhances the sense of place and responds to the evolving needs of the community. Our transportation system is environmentally responsible and supports low carbon transportation options.

Draft **GOAL 4: Promote connected multimodal options that support activated commercial spaces.**

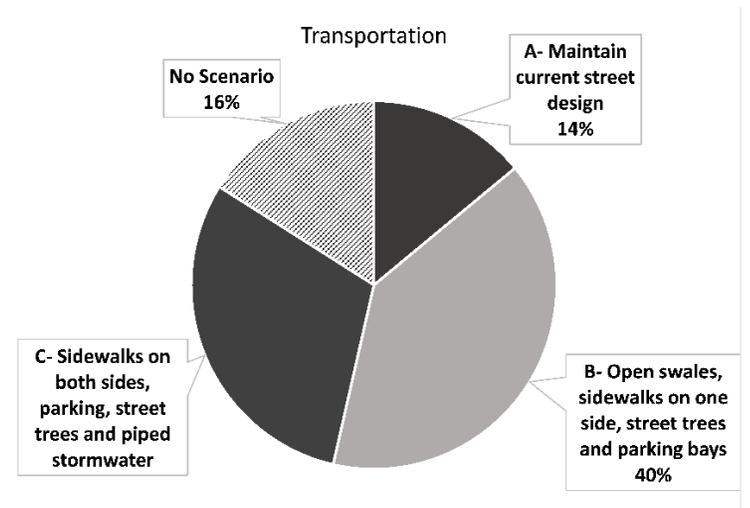

IDEAS & VALUES (FALL 2017)

- Expand bike paths
- Mixed-use zoning for local businesses surrounding community center
- Walkable community markets and centers to build community
- Walk/bike to grocery store or coffee shop
- Mixed commerce (small, locally-owned business) with intelligent traffic control and clear
- bike/pedestrian sidewalks
- Roundabouts to slow traffic and increase business opportunities
- Encourage gathering "nodes"-especially where they already are, and make them walkable
- A more walkable/bikeable/runnable community would help bring us together
- Safe bike and walking paths that connect to other side of Beltline
- Need more crosswalks on RR at bus stops and river access paths
- Increase access in and out of Santa Clara
- Bus stops by schools and businesses
- An alternative way to connect River Road and Santa Clara, e.g. pedestrian bridge or subway to walk and bike between River Road and Santa Clara
