System Development Charge Methodologies

Appendix A

Definitions of General Terms and Transportation Use Codes

&

Cross-References for Wastewater & Parks SDCs Based Upon HUD BPR Use Codes Descriptions

January 2019

Appendix A

Definitions of General Terms and Use Codes

Accessory Dwelling Unit (ADU): (Also referred to as a Secondary Dwelling Unit). As used in the determination of SDC rates, an accessory dwelling unit is any interior, attached or detached residential structure that is used in connection with or that is accessory to a single family dwelling on the same lot. An ADU typically has the following components:

- separate ingress / egress
- living area
- kitchen facilities including sink (in addition to bathroom sink), refrigerator, or stove
- separate bathroom

Acquisition Costs: The indirect or direct amount expended to procure use, possession, rights, or title as related to the construction of public improvements. This cost may be determined by current market experience, or other reasonable and prudent methods approved by the City Engineer.

Administrative Charge: A City charge to recover costs associated with staff time to review a permit's SDC impact, the development of the methodologies, the provision of an annual accounting of system development charge expenditures, and the implementation and operational costs associated with the SDC program.

Assessable Costs: The amount of capital improvement costs which are collected through the City's local improvement assessment program as established in City code. This cost has been removed from the total cost of capital improvements in determining the system-specific SDC.

Average Cost Determination:

- The average cost of inspecting and installing connections with the wastewater facilities and with the stormwater facilities, which are not part of the SDC as defined in E.C. 7.010, is the connection permit fee established by the City.
- If an applicant to connect to a wastewater or stormwater facility would result in extraordinary cost of inspecting and installing the connection, nothing in this definition shall prevent the City from requiring the applicant pay such costs. The extraordinary costs may be paid by the applicant in installments as part of the SDC.

Average Flow: The typical average daily flow of development, by type of land use. For purposes of calculating the Metropolitan Wastewater Management Commission SDC, this flow is expressed in terms of a unit of development.

BOD: Biochemical Oxygen Demand. The quantity of oxygen utilized in the biochemical oxidation of organic matter.

Change of Use of a Building in Its Entirety: An existing building proposed to redevelop in manner that changes all existing use classifications as determined by staff.

City Engineer: The City Manager, the person designated by the City Manager to serve as the City Engineer, or the City Engineer's designee.

City Manager: City Manager or designee.

Construction Costs: The cost in current fiscal year dollars for construction of future capital improvements.

Cost of Service: The calculation of a “per unit” cost to the City of providing system-specific capacity (e.g., wastewater collection capacity).

Credit: An amount that may be subtracted from the net SDCs assessed for a development. Credits may be based upon (a) previous payment or use, or (b) the costs of, or contributions to, certain capital improvements associated with the development.

Development Types: As used in determining SDC rates, development and uses of development sites are categorized, per system, depending on the relative impact. Also referred to as use codes.

EDU: Equivalent Dwelling Unit: EDU is used in the parks SDCs as a basis for determining the relative impact or service used by different types of development. Represents the use of capacity that is approximately equal to that of a single dwelling unit.

Equitable Share of Public Facility Costs: As used in the development of SDCs, the City’s cost of providing system capacity, allocated to new development relative to the development’s impact or use of system capacity.

FEU: Flow Estimation Unit. For the Metropolitan Wastewater Management Commission SDC, the Flow Estimation Unit is the unit of impact upon which the rate per unit is based. The FEU is typically per 1,000 square feet of building area for most commercial users, and dwelling units for residential development.

ITE: Institute of Transportation Engineers

Impact Measurement: The unit of system capacity used to determine the relative effect of a new development on the capacity of a specific system. For example, the number of gallons of discharge flow per plumbing fixture unit is used to determine the effect of various development types on the local wastewater system.

Impact Reduction: (a) Private physical improvements constructed as part of a development, or programs instituted in connection with the development, which will reduce the demand from that development upon one or more capital systems; (b) the amount by which an SDC fee is lowered based upon an impact reduction.

Impervious Surface: Impervious surface is used as an impact measure for the stormwater SDC. An impervious surface is that which prevents or retards saturation of water into the surface of the soil or causes water to run off the surface in greater quantity or at an increased rate of flow compared to the natural condition of the property before development. Asphalt, concrete, and roofing materials are examples of impervious materials.

Improvement Fee: The portion of the system-specific SDC charged for costs associated with capital improvements to be constructed to increase capacity of the system to accommodate new development.

Level of Service (LOS): (per unit of development) As used in development of SDC rates, LOS represents the amount of system (or sub-system) capacity provided at a certain point in time. The planned level of service is used as the basis for determining the system impacts of new development. This is presented in terms of the appropriate impact measure.

Living Area: As used in the determination of local wastewater SDC rates, living area is defined as the gross floor area, to the outside perimeter, of a dwelling including floor area within structures accessory to the dwellings that is intended for habitation, e.g. bonus rooms over garages, some attic spaces.

Low Impact Development (LID): As used in determination of stormwater SDC rates, LID is the management of stormwater runoff by approved infiltration and filtration facilities in accordance with standards specified in EC 9.6792 (3).

Methodology: This document entitled “City of Eugene Systems Development Charge Methodologies” and any amendment or modification made hereto.

Mixed-Use Development: As relating to Transportation Compact Development Adjustments (see section 4.4 of Appendix B / Transportation SDC Methodology), a development (either a single building or a group of buildings) that includes a combination of commercial and certain residential uses. Residential uses may include the following compact development types, but shall not include detached single-family dwelling or duplex development:

- Multi-family residential development, including apartments and apartment-style condominiums
- Rowhouses and townhouses

MWMC: Metropolitan Wastewater Management Commission - responsible for regional wastewater treatment.

Peak Flow: For purposes of the Metropolitan Wastewater Management Commission SDC, peak flow is the peak wet weather design capacity of the regional wastewater treatment plant.

PFU: Plumbing Fixture Units. PFUs are defined in the state Uniform Plumbing Code. A unit equivalent is assigned to different drainage fixtures depending on drain pipe or fixture size. The rate of charge per PFU will vary and is dependent upon a development’s land use and associated impact to the public wastewater system.

Private Physical Improvements (for impact reduction/mitigation): A facility or asset, designed and constructed at the developer’s expense, which is owned and maintained by the property owner or owner’s agent; not a program or activity or naturally occurring physical attribute.

Process Wastewater: Water which, during manufacturing or processing, comes into contact with or results from the production of or use of any raw material, intermediate product, finished product, byproduct or waste product.

Proportionate Share of Public Facility Costs: The cost of capital improvements which are reasonably attributable to new development.

Reimbursement Fee: The portion of the system-specific SDC charged for costs associated with capital improvements already constructed, or under construction when the fee is established, that have existing capacity to serve future growth.

Replacement Costs: The cost (in current fiscal year dollars) of replacing existing system capacity.

Residential Dwelling Unit (RDU): Residential Dwelling Units are used in the calculation of wastewater SDCs as a basis for determining the relative impact or service used by residential development. A base fee is applied to each RDU, such as one house, one accessory dwelling unit, or each apartment unit, plus a rate per square foot is applied to the total living area. For manufactured home parks, which are charged SDCs at the time a park's initial development permit is issued, the local wastewater SDC will be based upon the maximum size of manufactured home that can be placed on building pads located within the park. Each space shall constitute an RDU and the rate per square foot shall be applied to the total gross floor area of all additional proposed structures within the park.

SDC Eligible Costs: System value net of assessable costs, grants and outstanding debt. This cost is allocated to all development in proportion to its impact on system capacity.

SS: Suspended Solids. The total elements and compounds which float on the surface of, or are suspended in, wastewater and which are removable by laboratory filtration, expressed in milligrams per liter.

Secondary Dwelling Unit (SDU): See Accessory Dwelling Unit.

Single Family Dwelling (SFD): As used in EC 7.725(b) and this methodology, a "single family dwelling" means a "Dwelling, single family detached" as defined in EC 9.015.

TGSF: Thousand Gross Square Feet. Sum (expressed in the thousands, in decimal form) of the area of each floor level, including, but not limited to, basements, mezzanines, penthouses, corridors, mechanical rooms, and storage areas that are within the principal outside faces of the exterior walls. The City's TGSF definition is based upon the definition of "gross floor area" in the Institute of Traffic Engineer's *Trip Generation Manual*. TGSF measurements:

- Include exterior walls
- Include all areas that have clear standing headroom (6 feet, 6 inches minimum), regardless of their use
- Shall count the area of stairs once for each two floors the stairs connect
- Shall count the shaft of an elevator once, regardless of the number of stories it connects
- Do not include parking and drive aisle areas within parking garages

TGSFLA: Thousand Gross Square Foot Leasable Area

Transportation Demand Management (TDM): A transportation planning proposal for a given development that reduces the demand that development places upon the transportation system by redistributing or eliminating vehicle trips and encouraging the use of alternate modes of travel.

Unit of Development (Unit): Unit of measure for determining the size of a development for use in calculating the effect of the development on a system.

- Example: Number of Units of Development x Impact Measure per Unit = Impact of Development

Definitions of Transportation Use Codes

030 Truck Terminal

Truck terminals are facilities where goods are transferred between trucks, trucks and railroads, or trucks and ports.

090 Park & Ride Lot with Bus Service

Park-and-ride lots with bus service are areas used for the transfer of people between private vehicles and buses. They usually contain a bus passenger shelter, a parking lot, and circulation facilities for buses, as well as for private motor vehicles. In addition to park-and-ride, there are a significant number of passengers who are dropped off.

110 General Light Industrial

Industrial facilities have an emphasis on activities other than manufacturing, and may include activities such as printing, material-testing laboratories, and assembling of data processing equipment. Typically these facilities are freestanding and devoted to a single use/activity.

130 Industrial Park

Development within an industrial park is characterized by a mix of manufacturing, service, and warehouse facilities with a wide variation in the proportion of each type of use from one location to another. Industrial park tenants may be highly diversified; some parks may contain a large number of different types of small businesses, while others may have one or two dominant industries.

140 Manufacturing

Manufacturing facilities are areas where the primary activity is the conversion of raw material or parts into finished products. The size and type of activity may vary substantially from one facility to another. In addition to the actual production of goods, manufacturing facilities generally also have office, warehouse, research, and associated functions. This use code also includes general heavy industrial uses which are facilities typically limited to the manufacturing of large items.
[Combines ITE use codes 120 General Heavy Industrial and 140 Manufacturing.]

150 Warehousing

Warehouses are primarily devoted to the storage of materials; they may also include office and maintenance areas.

151 Mini-Warehouse

Mini-warehouses are buildings in which a number of storage units or vaults are rented for the storage of goods. Each unit is physically separated from other units, and access is usually provided through an overhead door or other common access point. These are often referred to as "self-storage facilities."

160 Data Center

Data centers are free-standing, warehouse-type facilities that are primarily used for off-site storage of computer systems and associated components, including applications and secure data. Data centers may be occupied by single or multiple tenants and may include maintenance areas and a small office. Data centers typically have a small number of employees and visitors.

170 Utilities

Utilities are free-standing buildings containing electromechanical or industrial space equipment. These facilities may include storage areas and office space.

210 Single-Family Dwelling / Duplex

This use code includes single-family detached housing, mobile homes, and /duplex homes on individual lots.

[Combines ITE use codes 210 Single-Family Dwelling and 240 Mobile Home Park.]

211 Accessory Dwelling Unit (ADU) / Secondary Dwelling Unit (SDU)

Any interior, attached or detached residential structure that is used in connection with or that is accessory to a single family dwelling on the same lot. An ADU typically has the following components:

- separate ingress / egress
- living area
- kitchen facilities including sink (in addition to bathroom sink), refrigerator, or stove
- separate bathroom

220 Apartments

Apartments are rental dwelling units located on the same property with at least two other dwelling units.

230 Condominium/Townhome

Condominiums/townhomes are ownership dwelling units constructed in a group of three or more attached units.

251 Senior Housing Development

Senior adult housing consists of detached independent living developments, such as retirement communities, age-restricted housing and active adult communities. In addition to residential units, these developments may include golf courses, pools, security, transportation and common recreational/social facilities.

[Combines ITE use codes 251 Senior Adult Housing – Detached and 252 Senior Adult Housing - Attached.]

253 Congregate Care Facility / Continuing Care Retirement Community

Congregate care facilities are independent living developments that provide centralized amenities such as dining, housekeeping, transportation, and organized social/recreational activities. Limited medical services may or may not be provided.

254 Assisted Living / Nursing Home

Assisted living developments and nursing homes are residential facilities that provide protective oversight and/or daily care to mentally or physically limited persons. Assisted living facilities provide routine general assistance with activities necessary for independent living. They commonly have separate living quarters for residents and services related to dining, housekeeping, social and physical activities, medication administration, and transportation. Nursing homes are facilities whose primary function is to provide care for persons who are unable to care for themselves. Skilled nurses and nursing aides are available 24 hours a day. Both assisted living and nursing homes are occupied by residents who do very little or no driving; traffic is primarily generated by employees, visitors, and delivery trucks.

[Combines ITE use codes 254 Assisted Living and 620 Nursing Home.]

310 Hotel/Motel

Hotels are places of lodging that provide sleeping accommodations and supporting facilities, such as, restaurants, cocktail lounges, meeting and banquet rooms or convention facilities, limited recreational facilities (pool/fitness room), and other retail and service shops. Motels are places of lodging that provide sleeping accommodations and often a restaurant. Motels generally have little or no meeting space.

[Combines ITE use codes 310 Hotel and 320 Motel.]

411 City Park

City parks are publicly owned and operated and may vary widely as to location, type, and number of facilities. Seasonal use of the individual sites differs widely as a result of the varying facilities and local conditions.

430 Golf Course

Golf courses can be publicly or privately maintained and operated. This category also includes private country clubs. Some sites have driving ranges and clubhouses with a pro shop and/or restaurant, lounge, and banquet facilities.

437 Bowling Alley

Bowling alleys are recreational facilities that include bowling lanes. A small lounge, restaurant and/or snack bar, video games, and pool tables may also be available.

444 Movie Theater

Movie theaters consist of audience seating, single or multiple screens and auditoriums, a lobby, and a refreshment stand. Matinees may or may not be provided.

[Combines ITE use codes 443 Movie Theater without Matinee, 444 Movie Theater with Matinee, and 445 Multiplex Movie Theater.]

491 Racquet/Tennis/Handball Facility

Racquet, tennis, squash, and handball sports facilities may be either publicly or privately owned and include indoor and/or outdoor facilities. These facilities may include other ancillary uses such as swimming pools, saunas, weight rooms, snack bars and retail.

[Combines ITE use codes 490 Tennis Courts and 491 Racquet/Tennis Club.]

492 Health/Fitness/Athletic Club

Health, fitness, and athletic clubs are privately owned facilities that may include swimming pools, whirlpools, saunas, tennis, racquet ball, and handball courts, exercise classes, weightlifting and gymnastics equipment, locker rooms, and a restaurant or snack bar. Athletic clubs may offer additional team sports activities and social facilities.

[Combines ITE use codes 492 Health/Fitness Club and 493 Athletic Club.]

495 Recreational Community Center / Multi-Purpose Recreational Facility

Recreational community centers are facilities similar to and including YMCAs, often including classes and clubs for adults and children; a day care or a nursery school; meeting rooms; swimming pools and whirlpools; saunas; tennis, racquetball, and handball courts; exercise classes; weightlifting and gymnastics equipment; locker rooms; and a restaurant or snack bar. Multi-purpose recreational facilities contain two or more of the following uses: miniature golf, video arcade, bumper boats, go-carts, and golf driving ranges.

[Combines ITE use codes 435 Multi-Purpose Recreational Facility and 495 Recreational Community Center.]

520 Elementary School

Elementary schools typically serve students attending kindergarten through the fifth or sixth grade. This use category consists of public schools where bus service is usually provided to students living beyond a specified distance from the school.

522 Middle School / Junior High School

Middle schools or junior high schools serve students who have completed elementary school and have not yet entered high school.

530 High School

High schools serve students who have completed middle school or junior high school. Land use category includes both public and private high schools.

536 Private School (K-12)

Private schools in this category serve students attending kindergarten through the twelfth grade. Students may travel a long distance to get to private schools.

540 Junior/Community College

This use category includes two-year junior colleges, technical schools, or community colleges. Some include sizable evening programs.

550 University/College

This use category includes undergraduate universities or colleges that may offer graduate programs.

560 Worship Facilities

This type of facility is a building in which public worship services of any religious or spiritual practice are held. It may also house an assembly hall or sanctuary; meeting rooms; classrooms; and, occasionally, dining, catering, or party facilities.

[Combines ITE use codes 560 Church, 561 Synagogue, and 562 Mosque.]

565A Child Day Care Center

A child day care center is a facility where care for pre-school age children is provided, normally during the daytime hours. Day care facilities generally include classrooms, offices, eating areas, and playgrounds. Some centers also provide after-school care for children.

565B Adult Day Care Center

An adult day care center is a facility where care for older teens and adults is provided, normally during the daytime hours. Adult day care facilities generally include classrooms and social activity rooms, offices, and eating areas.

566 Cemetery

A cemetery is a place for burying the deceased, possibly including buildings used for funeral services, a mausoleum, and/or a crematorium.

590 Library

A library can be either a public or private facility that consists of shelved books, reading rooms or areas, and sometimes meeting rooms.

591 Lodge / Fraternal Organization

A lodge or fraternal organization typically includes a clubhouse with dining and drinking facilities, recreational and entertainment areas, and meeting rooms.

610 Hospital

A hospital is any institution where medical or surgical care and overnight accommodations are provided to non-ambulatory and ambulatory patients. The term "hospital" does not, however, refer to stand-alone medical clinics (facilities that provide diagnoses and outpatient care only) or to nursing homes (facilities devoted to the care of persons unable to care for themselves).

Hospital campuses may include outpatient services, medical office buildings/uses, diagnostic imaging, and/or pharmacies.

640 Animal Hospital / Veterinary Clinic

An animal hospital or veterinary clinic is a facility that specializes in the medical care and treatment of animals.

710 General Office Building

This use category provides for flexible tenant space and lends itself to a variety of business, commercial, and/or service activities uses, including subdivision or planned unit developments, containing general office buildings and support services. Uses may include offices, retail and wholesale stores, restaurants, recreational area, warehousing, manufacturing, industrial, scientific research functions, financial institutions, service stations.

[Combines ITE use codes 710 General Office Building, 714 Corporate Headquarters Building, 715 Single Tenant Office Building, 730 Government Office Building, 733 Government Office Complex, and 750 Office Park.]

720 Medical-Dental Office

A medical-dental office building is a facility that provides diagnoses and outpatient care on a routine basis but is unable to provide prolonged in-house medical and surgical care. This type of facility is generally operated by one or more private physicians or dentists. Medical office/clinic uses contained within a hospital campus are assessed under 610 Hospital use code.

[Combines ITE use codes 720 Medical-Dental Office and 630 Clinic].

731 Department of Motor Vehicles

A state motor vehicles department is an office-type building where driver license testing, vehicle registration, and other related functions are administered.

760 Research and Development Center

Research and development centers are facilities or groups of facilities devoted almost exclusively to the investigative activities to improve existing products and procedures or to lead to the development of new products and procedures. Research and development centers may contain offices and light fabrication areas.

770 Business Park

Business parks consist of a group of flex-type or incubator one- or two-storey buildings served by a common roadway system. The tenant space is flexible and lends itself to a variety of uses. Tenant spaces may be served by a garage door. Spaces may include offices, retail and wholesale stores, restaurants, warehousing, manufacturing, light industrial, scientific research functions, and/or recreational facilities.

811 Construction Equipment Rental Store

A construction equipment rental store is a business that specializes in the rental of construction-related equipment tools and supplies including, but not limited to, electrical and industrial tools, lawn and garden equipment, earthmoving equipment, and safety equipment.

812 Building Materials and Lumber Store

A building materials and lumber store is a small freestanding building that sells hardware, building materials, and lumber. The lumber may be stored in the main building or in a yard storage shed. The storage areas are not included in the total gross floor areas.

813 Free-Standing Discount Superstore

Free-standing discount stores and superstores offer a variety of customer services, centralized cashiering, and a wide range of products; some also include grocery. They often maintain long store hours, seven days a week.

[Combines ITE use codes 813 Free-Standing Discount Superstore and 815 Free-Standing

Discount Store.]

814 Variety/Dollar Store

A variety/dollar store is a retail store that sells a broad range of inexpensive items, often at a single price. Items sold typically include kitchen, cleaning, office, and household supplies.

816 Hardware/Paint Store

These stores typically sell home improvement supplies such as home-building materials, small tools, keys, locks, plumbing supplies, electrical supplies, cleaning products, housewares, paint, and lawn and garden products directly to consumers for use at home or for business.

817 Nursery (Garden Center)

A nursery or garden center is a freestanding building with an outside storage area for planting or landscape stock. Some have large greenhouses and offer landscaping services. Most have office storage, and shipping facilities. Outdoor storage areas are not included in the size for purposes of assessing the SDC.

[Combines ITE use codes 817 Nursery (Garden Center) and 818 Nursery (Wholesale).]

820 Shopping Center

A shopping center is an integrated group of commercial/retail stores that are planned, developed, owned and managed as a unit. In addition to a variety of store types, a shopping center may contain non-merchandising facilities, such as office buildings, movie theaters, restaurants, post offices, banks, health clubs, and recreational facilities (e.g. ice skating rinks, indoor miniature golf). A shopping center also provides on-site parking facilities sufficient to serve its own parking demands. In addition to the integrated unit of stores and commercial areas, a shopping center may include out-parcels (peripheral buildings or pads located on the perimeter of the center adjacent to the streets and major access points).

823 Factory Outlet Center

A factory outlet center is a shopping center that primarily houses stores that sell factory-made goods directly to consumers for less than current retail prices.

826 Specialty Retail Center and Other

Specialty retail centers are generally small strip shopping centers that contain a variety of retail shops and specialize in quality apparel, hard goods, and services such as real estate offices, dance studios, florists, and small restaurants. This use category also includes miscellaneous retail and services that may not fit into other available use categories, as determined by staff. A specialty retail center is typically oriented along and parallel to the adjacent street.

841 Automobile Sales

In addition to automobile sales, these dealerships often include areas for servicing, parts sales, offices, and used car sales.

[Combines ITE use codes 841 Automobile Sales and 842 Recreational Vehicle Sales.]

843 Automobile Parts Sales

These facilities specialize in the sale of automobile parts for do-it-yourself maintenance and repair. Items sold include items such as spark plugs, distributor caps, and batteries. These facilities are not equipped for on-site vehicle repair or automobile sales/service.

848 Tire Store

These stores primarily specialize in the sale, installation and repair of tires. Some stores also include other automotive maintenance or repair services and customer assistance. These stores generally do not contain large storage or warehouse areas.

850 Supermarket

Supermarkets are typically freestanding retail stores selling a complete assortment of food (sometimes in bulk), food preparation and wrapping materials, and household cleaning and servicing items. They may also contain facilities such as money machines, photo center, pharmacies, and video rental areas. *[Combines ITE use codes 850 supermarket and 854 discount supermarket.]*

851 Convenience Market (Open 24 Hours)

The convenience markets in this classification are open 24 hours per day. These markets typically sell convenience foods, newspapers, magazines, and often, beer and wine; and they do not have gasoline pumps.

852 Convenience Market (Open ~15 - 16 Hours)

The convenience markets in this classification are open 15 to 16 hours per day. These markets sell convenience foods, newspapers, magazines, and often, beer and wine; and they do not have gasoline pumps.

854 Discount Supermarket

Discount supermarkets are free-standing retail stores selling a complete assortment of food (often in bulk) and food preparation materials, and household cleaning and servicing items at discount prices.

857 Discount Club

A discount club is discount store or warehouse where shoppers pay a membership fee in order to take advantage of discounted prices on a wide variety of items such as food, clothing, tires, and appliances. Many items may be sold in large quantities or bulk. Some sites may include on-site fueling pumps.

862 Home Improvement Superstore

Home improvement superstores are freestanding warehouse-type facilities that typically provide a variety of construction, tools, supplies, and landscaping materials associated with home construction, remodeling and upgrades. Some of the sites also include garden centers/nursery facilities. The outside storage areas/garden areas are not included in the determination of the SDCs. They typically maintain long store hours seven days a week.

863 Electronics Superstore

Electronic superstores are large, freestanding facilities that specialize in the sale of home and vehicle electronic merchandise. They typically maintain store hours seven days a week. Major home appliances may also be sold at these facilities.

864 Toy/Children's Superstore

These stores are large, freestanding warehouse type facilities offering a variety of baby and child-oriented supplies, toys, clothing, and home-related goods.

875 Department Store

Department stores are free-standing facilities offering a variety of products, including apparel, footwear, home products, bedding and linens, luggage, jewelry, and accessories. These stores typically maintain long hours of operation, seven days a week.

876 Apparel Store

An apparel store is an individual store specializing in the sale of clothing.

879 Arts and Crafts Store

Arts and crafts stores are free-standing facilities that sell art, framing, décor, and seasonal merchandise. These stores may also provide in-store arts and crafts classes.

880 Pharmacy/Drugstore without Drive-Through Window

Pharmacies/drugstores are retail facilities that primarily sell prescription and non-prescription drugs. These facilities may also sell cosmetics, toiletries, medications, stationary, personal care products, limited food products, and general merchandise. These drugstores do not have drive-up windows.

881 Pharmacy/Drugstore with Drive-Through Window

Pharmacies/drugstores are retail facilities that primarily sell prescription and non-prescription drugs. These facilities may also sell cosmetics, toiletries, medications, stationary, personal care products, limited food products, and general merchandise. These drugstores have drive-up windows.

890 Furniture Store

These stores often include large show-rooms, featuring home furnishings, carpeting, and both pre-assembled as ordered furniture. Both customer pick-up and delivery options are often provided. These stores often also have large storage areas, which are included in the calculation of size for assessing the SDC.

911 Walk-In Bank

Walk-in banks are generally free-standing buildings without drive-in windows for customer service. They often provide walk-up ATMs.

912 Drive-In Bank

Drive-in banks provide facilities for motorists to conduct financial transactions (often including ATM access) while in a vehicle. Many also provide services for walk-in patrons within the building.

918 Hair Salon

Hair salons are facilities that specialize in cosmetic and beauty services, including hair cutting and styling, skin and nail care, and massage therapy. Hair salons may also contain spa facilities.

931 Quality Restaurant

Quality restaurants are full-service eating establishments with a typical duration of stay of at least one hour. Quality restaurants generally do not serve breakfast; some do serve lunch; all serve dinner. This type of restaurant is generally not part of a chain, reservations are often required, and patrons are served by a waiter/waitress. Some also contain bar/lounge facilities that support the restaurant.

932 Higher Turnover Restaurant, Including Tavern/Bar

A higher turnover restaurant consists of sit-down eating establishments that generally serve lunch and dinner, may also be open for breakfast, and are sometimes open 24-hours per day. These restaurants typically do not offer reservations; rather patrons wait to be seated. Turnover rates are usually one hour or less. Some facilities contained within this land use may also operate as a tavern, brewpub, or bar and serve alcoholic drinks.

[Combines ITE use codes 925 Drinking Place and 932 High-Turnover (Sit-Down) Restaurant.]

934 Fast Food Restaurant with or without Drive-Through

This use code includes both restaurants with drive-through windows and those without. These restaurants are characterized by long hours of service (some are open for breakfast, all are open for lunch and dinner, some are open late or 24 hours) and high turnover rates for eat-in customers.

[Combines ITE use codes 933 Fast-Food Restaurant without Drive-Through Window and 934 Fast-Food Restaurant with Drive-Through Window.]

937 Coffee/Donut Shop and Coffee/Donut Drive-Through Establishment

This use code includes single-tenant facilities serving coffee, beverages, pastries, sandwiches, and a variety of food/snack items and other small, miscellaneous products. This category includes shops with and shops without drive-through windows, as well as those with and those without indoor seating.

[Combine ITE use codes 936 Coffee/Donut Shop without Drive-Through Window, 937 Coffee/Donut Shop with Drive-Through Window, and 938 Coffee/Donut Shop with Drive-Through Window and No Indoor Seating.]

941 Quick Lubrication Vehicle Stop

These facilities primarily perform oil change services for vehicles. Other ancillary services provided may include preventative maintenance, such as fluid and filter changes. Automobile repair service is generally not provided.

942 Auto Care Center

An automobile care center houses numerous facilities (that may or may not be under common ownership) that provide a variety of automobile-related services, such as repair and servicing, stereo installation, and seat cover upholstery.

944 Gasoline/Service Station

The primary activity for these stations is for the fueling of motor vehicles; some facilities may have ancillary servicing and/or repair services. This use includes service stations without convenience stores. For purposes of assessing the SDC, the vehicle fueling position is defined as the maximum number of vehicles that can be fueled simultaneously.

945 Gasoline/Service Station with Convenience Market with or without Car Wash

The primary activity for these stations is for the fueling of motor vehicles and provision of small food items, beverages and other ancillary convenience-oriented goods. Some facilities may have ancillary servicing and/or repair services. These facilities may include car washes. For purposes of assessing the SDC, the vehicle fueling position is defined as the maximum number of vehicles that can be fueled simultaneously.

[Combines ITE use codes 945 Gasoline/Service Station with Convenience Market and 946 Gasoline/Service Station with Convenience Market and Car Wash]

947 Self-Service Car Wash

Self-service car washes are stand-alone facilities, not co-located with gasoline/service stations, that allow for the manual cleaning of vehicles by providing stalls for the driver to park and wash the vehicle.

948 Automated Car Wash

Automated car washes are stand-alone facilities, not co-located with gasoline/service stations, that allow for the mechanical cleaning of the exterior of vehicles. Manual cleaning and detailing services may also be available.

950 Truck Stop

Truck stops are facilities that provide refueling, food, and other services to motorists and truck drivers. These facilities typically contain convenience stores, showers, restaurants, and on-site truck parking spaces.

Table A-1
Cross-References for Wastewater & Parks SDCs
Based Upon HUD BPR* Use Code Descriptions

* Bureau of Public Records, Housing and Urban Development

Eugene Wastewater SDC Use Code	Eugene Park SDC Use Code	HUD BPR Land Use Codes	Land Use Description
1F	SFD	1111	Single Family Housing
1F	SFD	1119	Common or Open Area - Typically In Single Family Area
