City of Eugene provides more portable restrooms throughout the community

With a focus on increasing hygiene in the community, the City of Eugene continues to add to the number of publicly available restrooms. The City's Emergency Operations Center today completed additional installation of an additional 25 portable restrooms.

This brings the total number of portable restrooms distributed around the city to nearly 40. There are also approximately 50 handwashing stations through Eugene.

According to the Centers for Disease and Control, regular handwashing is one of the best ways to remove germs, avoid getting sick, and prevent the spread of germs to others, including COVID-19.

You can view the locations of all of the portable restrooms and handwashing stations through our [online mapping portal](#).
