

URBAN RESERVES 10-Year Option

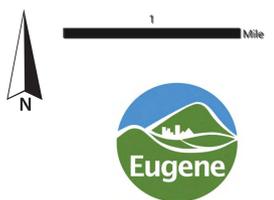

Smallest Urban Reserve option; provides the least land in the future for urban growth boundary expansion and preserves the most farm and forest land. The scattered pattern of properties significantly limits opportunities for efficient and cost-effective future neighborhoods.

This option reserves enough land to meet the projected needs of 10 years of growth beyond 2032. A 10-year Urban Reserve is the smallest size allowed by law.

For more information, see the Urban Reserves Options Story Map at <https://arcg.is/05OzKS> and the Urban Reserves web page at www.eugene-or.gov/UrbanReserves
