

Project Information Sheet

Wastewater Rehabilitation – Harlow Area

Project Overview:

- Work will occur primarily in the area North-South between Cal Young Road and Harlow Road and East-West between Woodside Drive and Arcadia Drive.
- This work will include cleanout installation, mainline pipe lining, lateral pipe lining, and manhole sealing.
- This area was identified for rehabilitation because it has high levels of groundwater infiltration due to pipe defects, according to city-wide monitoring of wastewater flow rates.

Construction Schedule:

- Project construction will be during summer 2021 and summer 2022.

Water Use Impacts:

- Local residents and businesses may be asked to cease water usage for brief windows of time during construction to avoid risk of water backing up into their buildings.

Traffic Impacts:

- Drivers should expect lane closures and lane shifts during construction.
- On street parking may be restricted to accommodate construction activities.
- Bicyclists should expect to merge with motor vehicle traffic depending on available lane widths during construction.
- With any construction, drivers should expect equipment and workers in the roadway leading to congestion and delays during the work.

Project Funding:

- Wastewater Utility Fees.
- Wastewater System Development Charges (SDC's).

For More Information:

- Project Manager: Jennah Maier, phone 541-852-2227, JMaier@eugene-or.gov.
