

Project Information Sheet

Coburg Road Paving

Project Description:

- Coburg Road shows signs of deterioration, due to pavement age and traffic loading, and is scheduled for repaving. The repaving project will also reconstruct sidewalk access ramps along the length of the project in compliance with the Americans with Disabilities Act.

Project Scope:

- Coburg Road will be repaved between the Ferry Street bridge and Oakway Road.

Construction Schedule:

- Project construction is planned to start in the spring 2023.

Travel Impacts:

- Most of the roadway paving operation will take place at night. Work on sidewalk access ramps will happen during normal business hours.
- People driving should expect lane reductions and lane shifts during construction, use alternate routes when possible.
- People walking should expect detours and some temporarily closed crossings
- Expect equipment and workers in the roadway leading, with possible congestions and delays.

Project Funding:

- The major source of funding is the 2017 Street Preservation Bond. .
